# 1. Introdução ao Documento

## **1.1. Área de negócio do Sistema**

Sistema de cadastro para LiveStreams, podendo atuar como Streamer ou Espectador-Seguidor dependendo da escolha durante o cadastro

## **1.2. Principais funcionalidades**

Cadastro de Streamer ou Espectador-Seguidor, Função de excluir cadastro de um seguidor para a entidade Bot, e métodos de abrir e fechar uma live, e alterar seu título para a entidade Streamer.

## **1.3. Método de trabalho**

Serão utilizadas as seguintes ferramentas:

Banco de dados MySQL

SGBD: MariaDB

Linguagem: Java

IDE: Eclipse/Netbeans

## **2.0. Modelo de Dados**

## 2.1. Modelo de Visão:

Este banco de dados se trata de um sistema para cadastro de Lives, onde terá Streamer, Live, Categoria, Bot e Espectador, com sua especificação de Seguidor (follower) onde seguidor vai herdar de Espectador.

Live pode ter 1 ou vários Bot's e Bot's podem moderar 1 ou várias lives (N para N)

**Streamer** : Realizará as transmissões (lives) e também responsável pela configuração da mesma. Terá: id\_streamer, nome, usuario, senha, dt\_cadastro e inlive

**Bot** : Terá a função de excluir um cadastro de seguidor, caso seja necessário. (para casos de qualquer tipo de preconceito por exemplo) Terá: id\_bot (PK) e nome

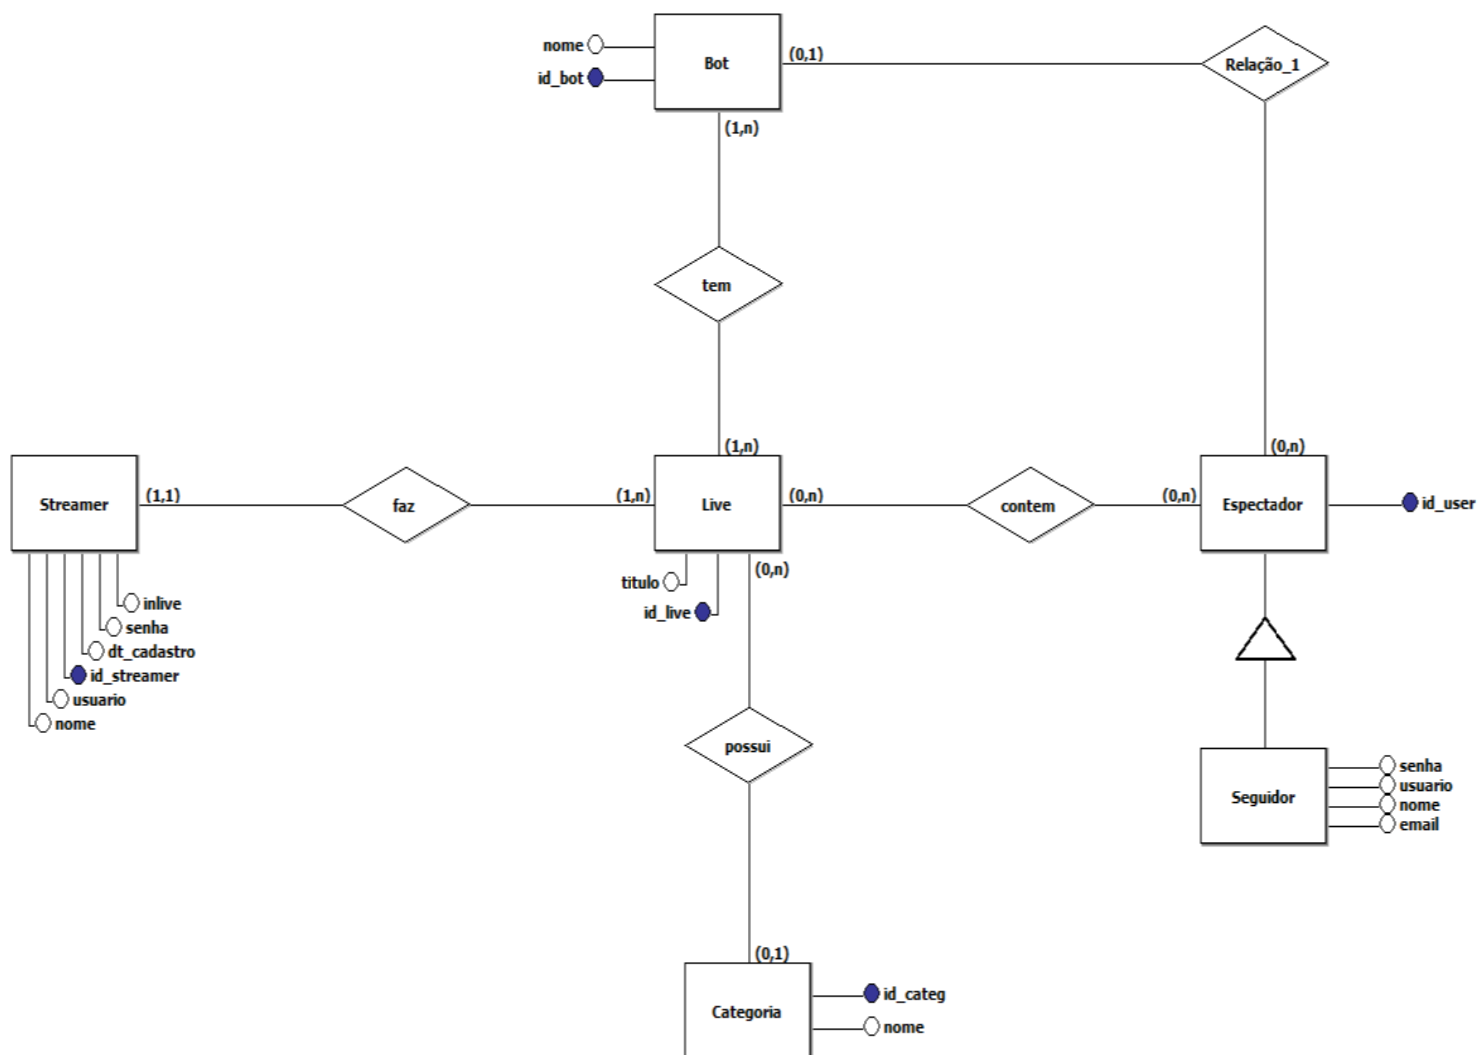

**Espectador** : Poderá assistir as lives e decidir se continuará apenas como espectador ou se tornará seguidor da live, realizando o cadastro. Terá: id\_user(PK)

**Seguidor** : Herdará de Espectador, adicionando os campos : email,nome, usuario, senha e dt\_cadastro.

**Live**: A própria transmissão em si, com sua devida categoria servindo como "produto" . Terá: id\_live(PK), id\_streamer (FK), título e id\_categ

**Categoria**: Seria o nome do jogo que estará sendo transmitido. Terá: id\_categ e nome

## 2.2. Modelo Conceitual

## 2.3. Modelo Lógico

**Streamer** (id\_streamer, nome, dt\_cadastro, usuario, senha e inlive)

id\_streamer - Primary key

**Categoria** (id\_categ, nome)

id\_categ – Primary Key

**Live** (id\_live, id\_streamer, id\_categ, titulo)

id\_live - Primary key

id\_streamer referencia Streamer

id\_categ referencia Categoria

**Bot** (id\_bot, nome)

id\_bot - Primary key

**Espectador\_Seguidor** (id\_user, nome, dt\_cadastro, email, usuario, senha, id\_bot)

id\_user - Primary key

id\_bot referencia bot

**Live\_bot** (id\_bot, id\_live)

id\_bot referencia Bot

id\_live referencia Live

id\_live, id\_bot - Primary Key

**Live\_Espectador\_Seguidor** (id\_user, id\_live)

id\_user referencia espectador\_seguidor

id\_live referencia live

id\_user, id\_live - Primary key

## 2.4. Dicionário de Dados

| Tabela                   | Descrição  |   |                           |
|--------------------------|--|---|---------------------------|
| Streamer                 | Realizará as transmissões (Lives)  |   |                           |
|                          |  |   |                           |
| Campo                    | Tipo   | Descrição   | Observações e Regras      |
| nome                     | varchar(100)   | Nome completo do Streamer                                       | Not Null                  |
| id_streamer              | int (auto incremento)  | id associado ao Streamer  | Not Null / PK             |
| email                    | varchar(50)  | E-mail do Streamer  | Not Null / Unique         |
| usuario                  | varchar(20)  | Usuario (Login) do Streamer                                     | Not Null / Unique         |
| senha                    | varchar(20)  | Senha utilizada pelo Streamer                                   | Not Null                  |
| dt_cadastro              | date   | Data de cadastro como Streamer                                  | Not Null                  |
| inlive                   | boolean  | Determinará se o Streamer está no modo Streaming ou não         | Not Null                  |
|                          |  |   |                           |

### **2.5.3. Os Relatórios e os comandos Selects**

#### **Relatórios:**

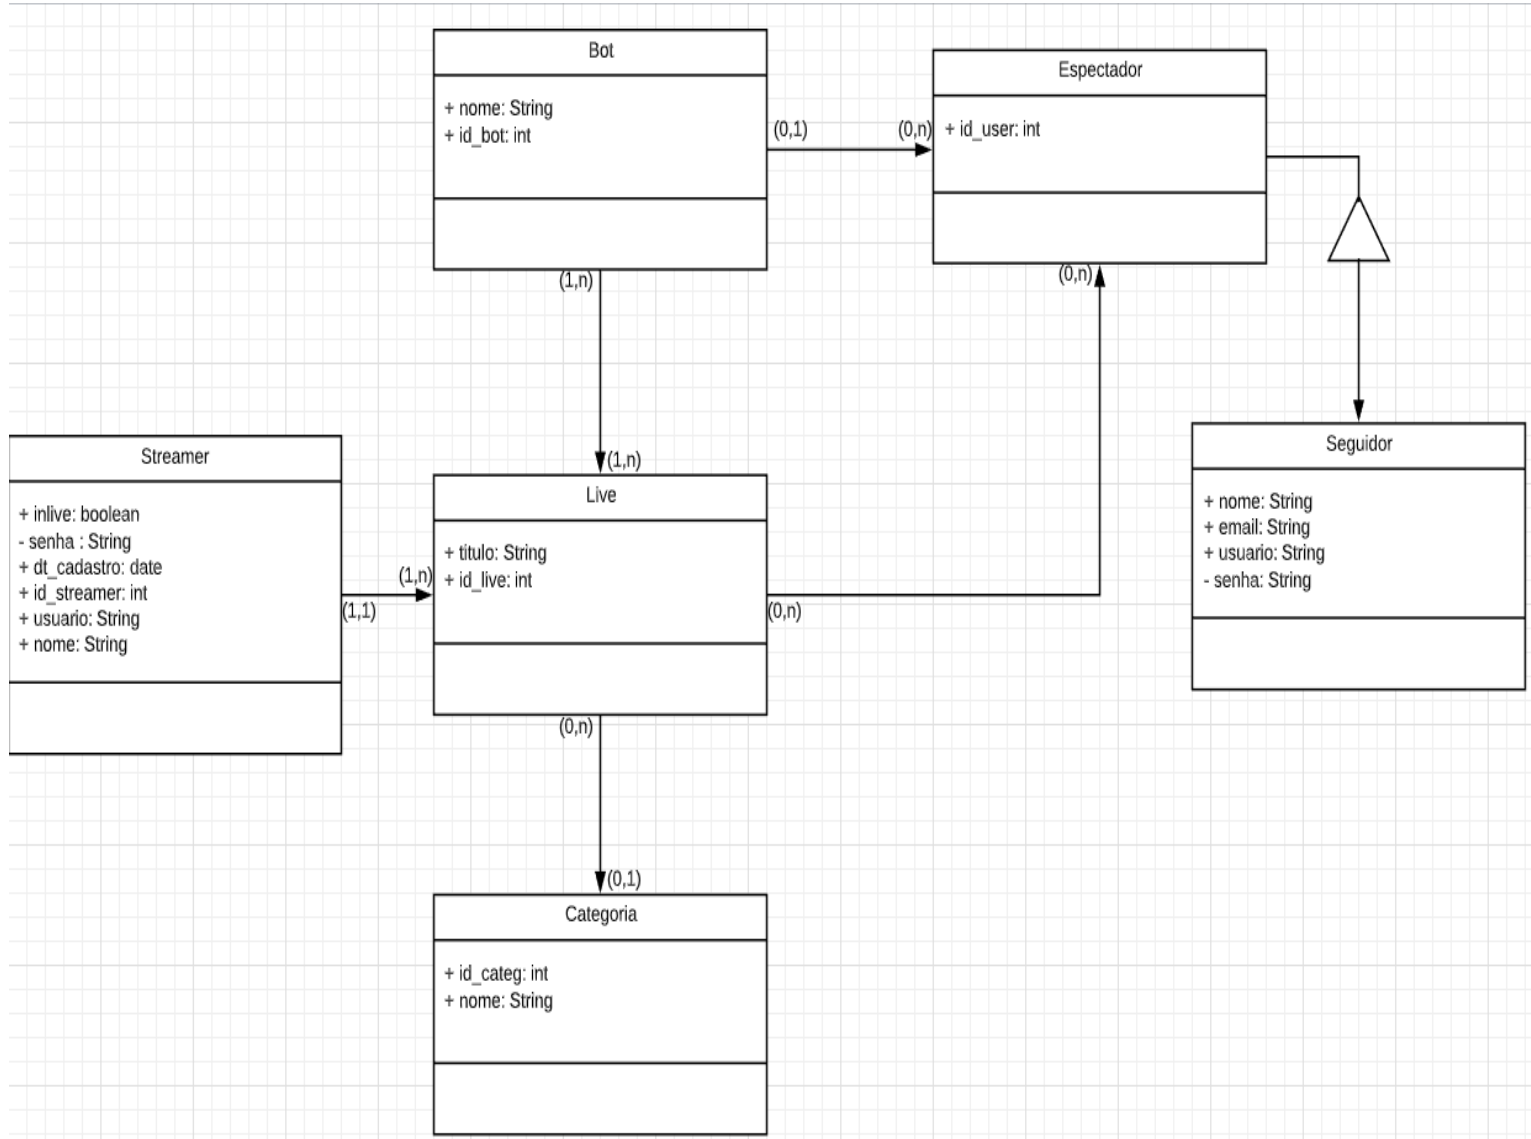

- 1 - Listar a quantidade de lives por Bot
- 2 - listar os nomes e emails dos seguidores da live de código 3.
- 3 - Listar a quantidade de cadastro de streamers, por mês e no ano de 2019.
- 4 - Listar os bots cadastrados
- 5 - listar as lives, ordenando pela categoria.

#### **Selects:**

- 1) Select count(liv.id\_live), bot.nome as nome\_bot from live liv, live\_bot lbo, bot where liv.id\_live = lbo.id\_live and lbo.id\_bot = bot.id\_bot group by bot.nome;
- 2) Select ese.nome, ese.email, liv.id\_live from live liv, espectador\_seguidor ese, live\_espectador\_seguidor les where liv.id\_live = 3 and liv.id\_live = les.id\_live and les.id\_user = ese.id\_user;
- 3) Select id\_streamer, dt\_cadastro from streamer where YEAR(streamer.dt\_cadastro) = 2019 group by MONTH(streamer.dt\_cadastro);
- 4) Select id\_bot, nome FROM bot;
- 5) select live.id\_live, live.titulo, categoria.nome from live, categoria where live.id\_categ = categoria.id\_categ order by categoria.nome;

## 3.0. Análise e Design

### 3.1. Diagrama de Classes

## 4.0. Arquitetura do Software

### 4.1. Padrão de projeto

Padrão MVC é um padrão de arquitetura de Software, onde ele vai separar sua aplicação em 3 camadas, a camada de interação com usuário (View), a camada de manipulação dos dados (Model) e a camada de controle (Controller).

### 4.2. Protótipo

#### 4.2.1. Telas e Classes da camada View, Requisitos Funcionais e os Códigos das Classes

Na **TelaInicial.java**, temos 5 botões, cada um com suas respectivas funções, onde o próprio nome do botão já indica sua funcionalidade, ao clicar em um dos botões, o usuário será direcionado a respectiva tela responsável pela função que os botões indicam.

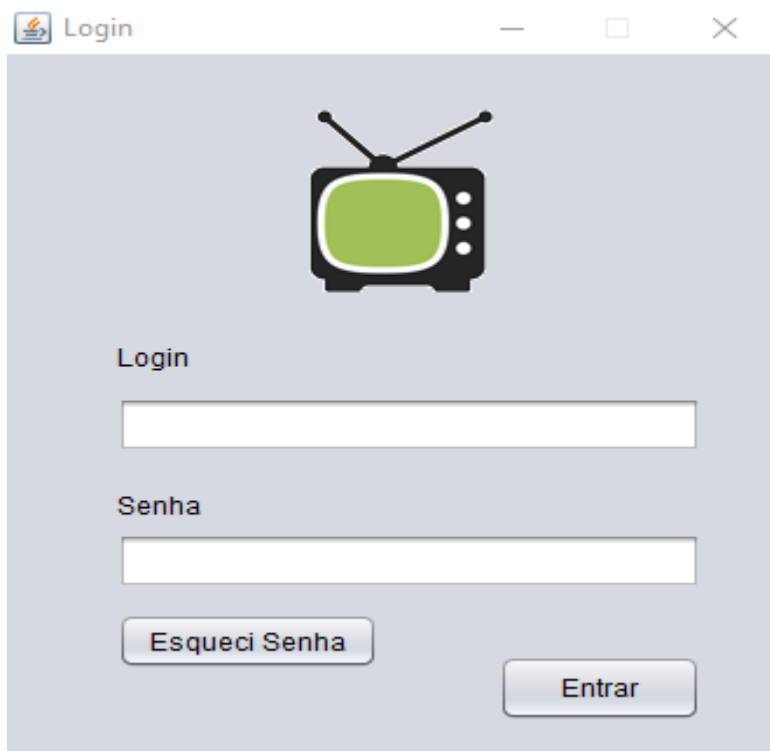

The image shows a Java Swing window titled "Cadastro". It contains four text input fields: "Nome", "E-mail", "Senha", and "Confirme". The "Senha" and "Confirme" fields are side-by-side. At the bottom, there are two buttons: "Cancelar" and "Cadastrar".

| Field Label | Field Type |
|-------------|------------|
| Nome        | Text       |
| E-mail      | Text       |
| Senha       | Password   |
| Confirme    | Password   |

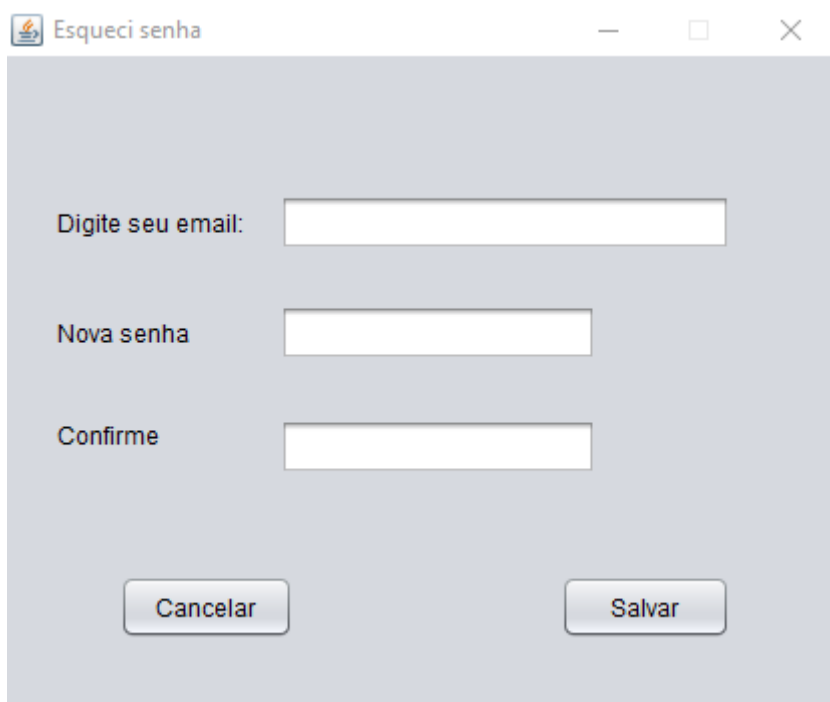

Buttons: Cancelar, Cadastrar

A **TelaCadastro.java** será usada para todos os tipos de cadastro, como Streamer ou Seguidor, preenchendo os campos de textos e os de senha e clicando em 'Cadastrar' para finalizar e concluir o cadastro ou em 'cancelar' para não realizar nenhum registro.

A **TelaLogin.java**, será mostrada caso o usuário escolha a opção de 'acessar' e tenha realizado cadastro, seja como Streamer ou Espectador para, e nesta tela também há uma funcionalidade para os usuários cadastrados que esqueceram suas senhas, fazendo com que ao clicar, sejam redirecionados para outra tela (TelaEsqueci) onde poderá estar criando uma nova senha.

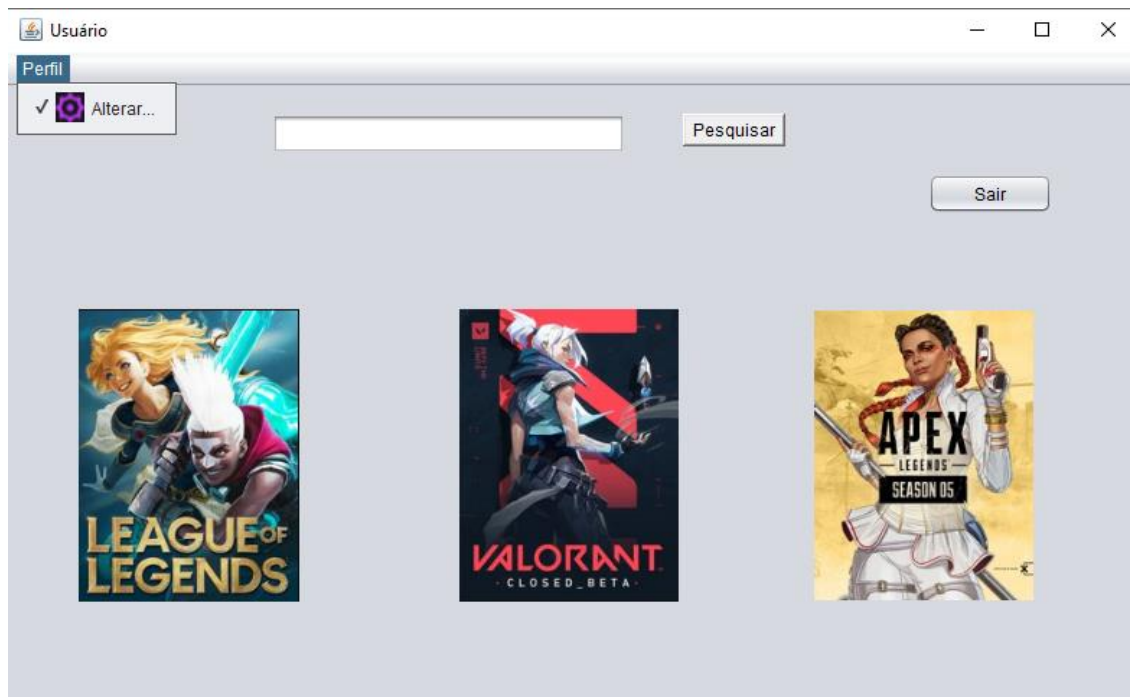

Esqueci senha

Digite seu email:

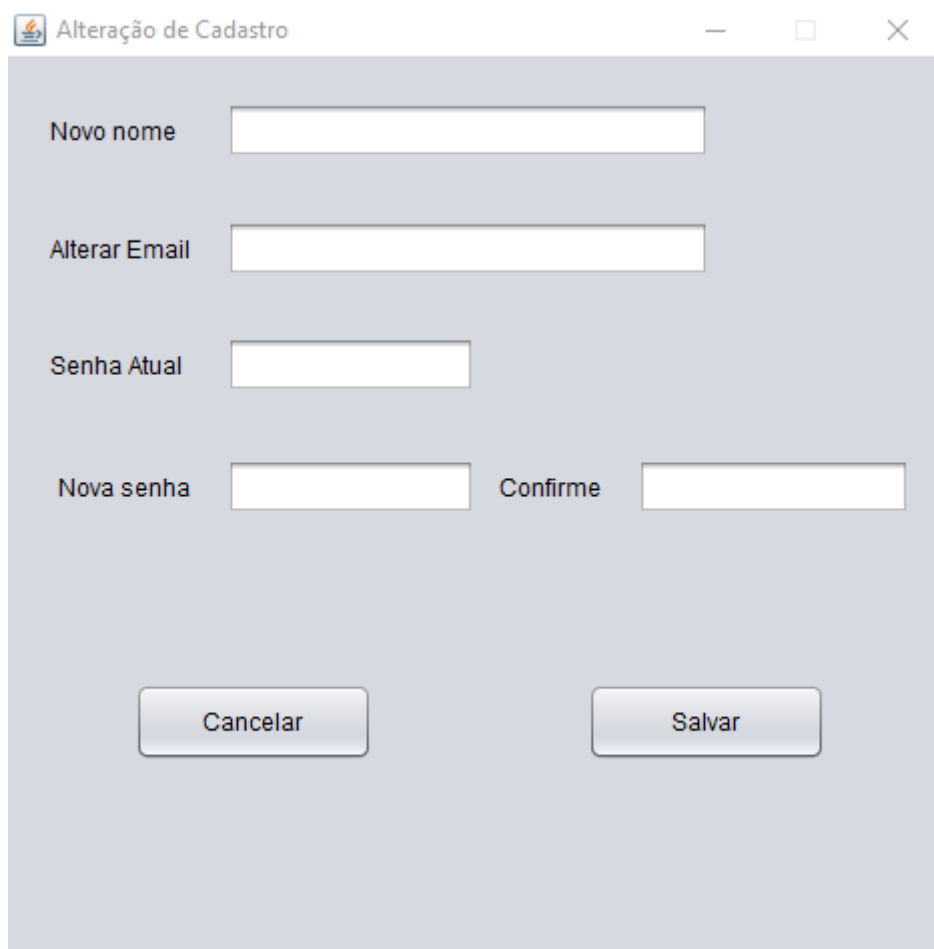

Nova senha

Confirme

A **TelaEsqueci.java** é exibida após um usuário cadastrado clicar em 'esqueci senha', funcionalidade da **Tela Login**, para que o usuário possa criar sua nova senha, preenchendo os demais campos (Texto e Senha) e clicando em 'Salvar' para que a operação seja realizada, ou em 'Cancelar' para abortar a alteração, caso ele lembre da senha durante a etapa.

A **TelaSeguidor.java** será exibida após o usuário que anteriormente, realizou um cadastro como seguidor, fizer o Login, tendo um botão 'Sair' para fechar a tela, um menu 'Perfil' com um item de menu chamado 'Alterar...' que ao ser clicado, irá direcionar o usuário a **Tela de Alteração de Cadastro**, onde poderá alterar seu nome, email e senha, preenchendo os campos solicitados e salvando as alterações, clicando no botão 'Salvar'.

Alteração de Cadastro

Novo nome

Alterar Email

Senha Atual

Nova senha  Confirme

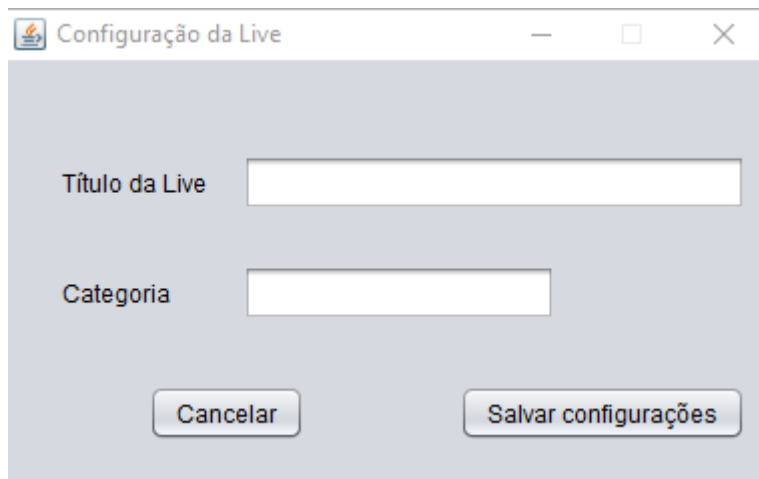

Cancelar Salvar

A **TelaAlterar.java**, será exibida após o usuário Seguidor clicar em 'Alterar', funcionalidade esta que se encontra na **Tela de Seguidor**, onde ao preencher os campos de texto e senha e clicando no botão de 'Salvar' irá realizar as alterações nos registros de seu cadastro, ou clicando no botão 'Cancelar' para desistir de efetuar as alterações.

A **TelaStreamer.java** será exibida após o usuário cadastrado como Streamer realizar o Login, tendo itens de Menu como 'Abrir Live' que ao ser clicado irá exibir a mensagem "Transmissão Iniciada" e 'Fechar Live' trará a mensagem "Transmissão Encerrada", já o item Configurações irá abrir a **Tela de Configuração da Live**, para que o Streamer preencha os campos de Título e Categoria referentes a Live, tendo como opção um botão de 'Salvar Configurações' ou 'Cancelar' para abortar operação.

Nesta mesma **Tela de Streamer** em 'Bots' haverá um item de menu 'Configurar' que irá trazer a **Tela de Bots**.

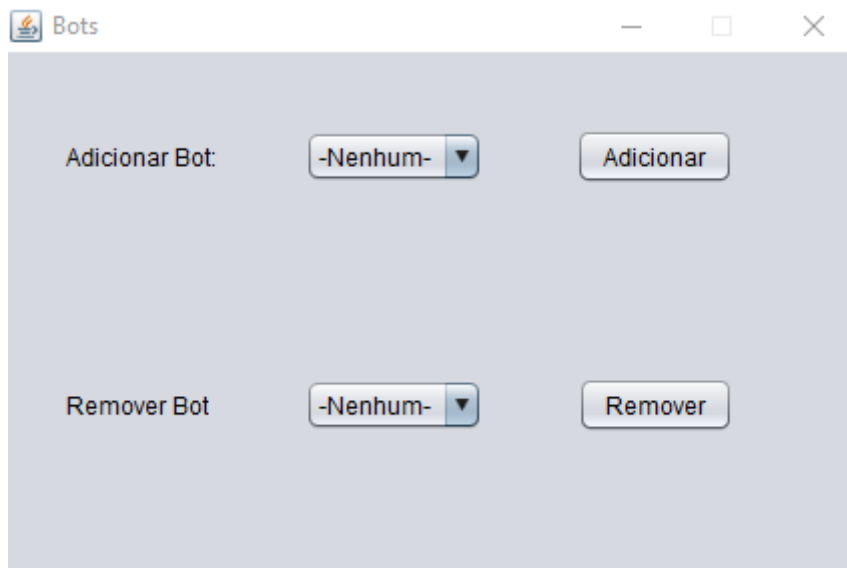

Configuração da Live

Título da Live

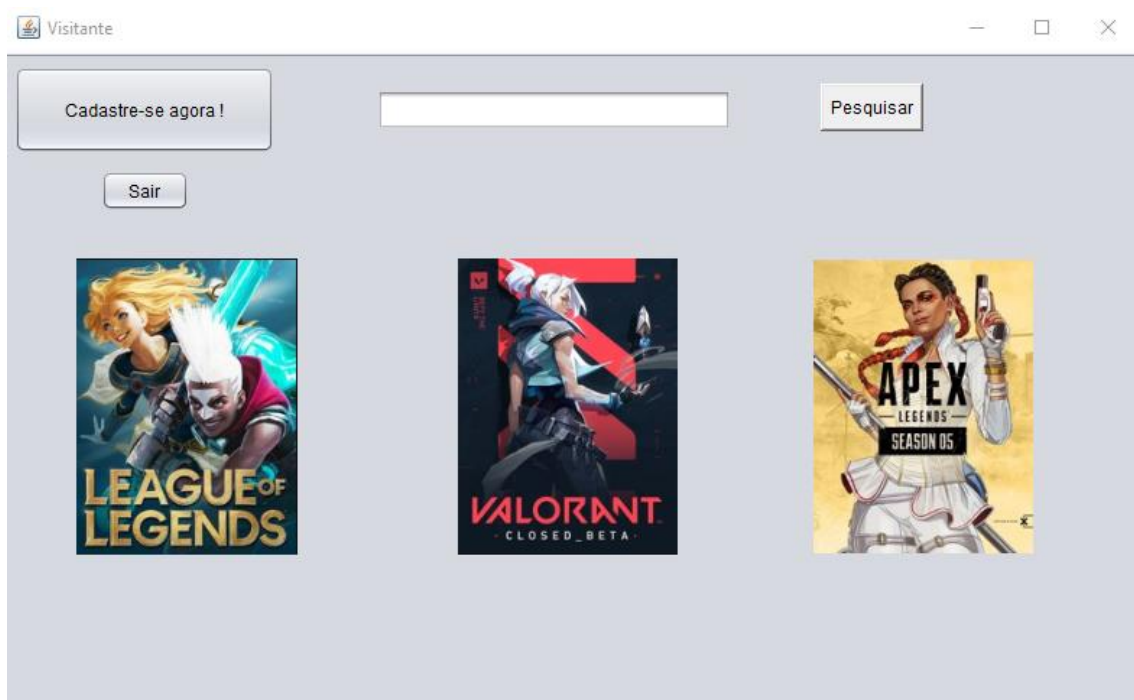

Categoria

Cancelar Salvar configurações

A **Tela LiveConfig.java** será exibida caso o Streamer clique em 'Configurações', ao preencher os campos, clicando em 'Salvar configurações' irá finalizar e concluir a operação, e 'Cancelar' irá fechar a tela sem realizar alguma alteração.

A **TelaBots.java**, exibida após o Streamer clicar em 'Bots' e em 'Configurar' funcionalidades que pertencem a **Tela Streamer**, para que o Streamer decida qual Bot ele quer adicionar ou remover, selecionando por nome nas caixas de seleção e finalizando a operação ao clicar nos botões 'Adicionar' ou 'Remover'.

A **TelaVisitante.java** será exibida para o usuário que ainda não é cadastrado em nenhuma das opções, ou que simplesmente decidam acessar como visitante, funcionalidade disponível na **Tela de Login**, ao clicar no botão 'Acesar', terá botão de 'Sair' para fechar a tela e um botão 'Cadastre-se agora!' caso o visitante tenha interesse em se cadastrar, ao clicar no botão de 'Cadastre-se agora' o visitante será direcionado para a **Tela de Cadastro**.

# Códigos das Classes View
